Sample Testing Period

: Apr. 01, 2024 - Apr. 10, 2024

Test Result Summary:

As requested by the applicant, for details refer to attached page(s).

TEST ITEM(S)	TEST REQUESTED	CONCLUSION(S)
Two hundred and forty (240) substances of SVHC	ECHA's Candidate list of Substances of Very High Concern (SVHC) for authorization on and before Jan. 23, 2024 of Regulation (EC) No. 1907/2006 concerning the REACH	According to the analyzed result(s) of the submitted sample(s), the contents of mentioned SVHC test items are less than 0.1% (w/w).

## Test Result(s):

### Candidate List of Substances of Very High Concern for authorization published by European Chemicals Agency (ECHA) Regarding Regulation (EC) No. 1907/2006 concerning the REACH

**Test Method:** Acid digested or extracted by organic solvent, the solutions were analyzed by ICP-OES, UV-vis, GC-MS, LC-MS and so on

<u>Chemical Substance<sup>^</sup></u>	<u>CAS No.</u>	<u>Result(s) % (w/w)</u>		
		<u>G01</u>	<u>G02</u>	<u>G03</u>
All SVHC in ECHA's Candidate list	-	N.D.	N.D.	N.D.

- Note:**
- 0.1% = 1000mg/kg;
  - N.D. = Not Detected (Less than Report Limit);
  - Report Limit = 0.010% (w/w);
  - "^" = For details of the Chemical Substance in Candidate List, refer to below Annex about Candidate List of substances of very high concern for Authorisation(SVHC).
  - Test results in this report are based on the tested sample. This report refers to testing result of tested sample submitted as homogenous material(s). In case such material is being used to compose an article, the results indicated in this report may not represent SVHC concentration in such article. If this report refers to testing result of composite material group by equal weight proportion, the material in each composite test group may come from more than one article.
  - The chemical analysis of specified SVHC is performed by means of currently available analytical techniques against the following SVHC related documents published by ECHA:  
<https://www.echa.europa.eu/candidate-list-table>.
  - EU or EEA suppliers of articles which contain substances on the Candidate List in a concentration above 0.1% (w/w) have to provide sufficient information to allow safe use of the article to their customers or upon request, to a consumer within 45 days of the receipt of the request. This information must contain as a minimum the name of the substance.
  - If a SVHC is found over the reporting limit, client is suggested to identify the component which contains the SVHC and the exact concentration of the SVHC by requesting further quantitative analysis from the laboratory.
  - In accordance with Regulation (EC) No 1907/2006, any EU producer or importer of articles shall notify ECHA, in accordance with paragraph 4 of Article 7, if a substance meets the criteria in Article 57 and is identified in accordance with Article 59(1) of the Regulation, if both the following conditions are met:
    - The substance in the Candidate List is present in those articles in quantities totalling over one tonne per producer or importer per year;
    - The substance in the Candidate List is present in those articles above a concentration of 0.1% weight by weight (w/w).

This report is only responsible for the tested sample(s) from the client, the testing result(s) is used for scientific research, teaching or internal quality control. Without the writing agreement of the company, the client is not allowed to copy the report in part (entire copy is excepted).
